

IA/PSD Case System : Summary (Public)

On July 27, 2023, a departmental concern was made via memo of Officer Pfeifer, E. failing to report a use of force. It was investigated and found not to constitute a valid use of force, but rather an incident which should have been issued a case report. The officer was advised to document a report of this incident in which he attempted to apprehend a suspect of theft who fled on foot, and while he made limited contact with the subject, it did not meet a use of force criteria. He was also counseled on the necessity of completing reports of criminal activity with all crucial elements detailed. However, the departmental complaint against him has been deemed unfounded (due to not being a use of force incident). The officer who brought forth the allegation against Officer Pfeifer, E. was counseled regarding applicability of response to aggression related to SB20-217 and clarified his role in potential policy violations and outcomes.
